SUMMARY

Aspiring software engineer with a proven track record of solving 700+ DSA problems and hands-on experience developing AI/ML applications, cloud-native systems, and full-stack applications, proficient in Java, Python, SQL, data structures, algorithms, and cloud computing.

EDUCATION

Rajeev Gandhi Memorial College of Engineering & Technology
B.Tech – Computer Science & Engineering (Cyber Security); CGPA: 7.91

Nandyal, AP
Sep 2023 – Apr 2027

TECHNICAL SKILLS

Languages: Java, Python, C, TypeScript/JavaScript, SQL
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks
Cloud & DevOps: Google Cloud Platform, Cloud Run, Pub/Sub, Compute Engine, Cloud Logging, Vertex AI, Docker
Web & Tools: React, Node.js, Vite, REST APIs, Firebase, MongoDB, Supabase, Git, GitHub, VS Code

PROJECTS

SITA – Security Incident Triage Agent:

Tech Stack: Google Cloud Run, Pub/Sub, Cloud Logging, Node.js, MongoDB, Socket.io, Gemini, ADK.

- Developed a cloud-native security agent for high-volume log ingestion and real-time incident analysis.
- Reduced manual security investigation time by **70%** through automated incident triage and AI-assisted analysis.
- Implemented event-driven processing with Pub/Sub and Cloud Run with real-time incident updates using Socket.io.

VidyAI – Voice-Powered AI Tutor:

Tech Stack: React, TypeScript, Node.js, Python, AI/ML, Speech Recognition, Firebase.

- Built a multilingual AI tutoring platform supporting voice, text, handwritten images, and code-based student queries.
- Implemented AI-powered evaluation and explainable feedback to automate student doubt resolution and assessment.
- Implemented user authentication and secure role-based access for students, teachers, and parents using Firebase.

CREDFLOW – AI-Powered Alternative Credit Assessment :

Tech Stack: React, Python, Node.js/Express, scikit-learn, Pandas, NumPy, Streamlit, Gemini, Google Cloud.

- Engineered an AI-powered credit assessment platform for evaluating the creditworthiness of unbanked nano-entrepreneurs using alternative financial data.
- Developed machine learning workflows using **scikit-learn, Pandas, and NumPy** for data processing, feature analysis, and credit-risk prediction.
- Integrated AI-assisted insights into a full-stack workflow using **React, Node.js/Express, Gemini, and Google Cloud**.
- Implemented user authentication and secure access controls to protect user data and platform functionality.

ACHIEVEMENTS

- Achieved a 1800+ rating on LeetCode, showcasing strong competitive programming and algorithmic problem-solving skills.**
- Ranked in the Top 0.4% in the Amazon ML Challenge 2025, approximately 100th among 25,000+ teams.**
- Secured 1st Place** at GDG TechSprint Hackathon organized by GDG on Campus RGM CET.
- Ranked P1** in Kaggle Community Olympiad on the regional leaderboard.
- Earned a Silver Medal** in the **Kaggle NFL Big Data Bowl 2026**, finishing **67th**.
- Shortlisted among the Top 10 Teams** at ArcticX Winter TechSprint Hackathon.
- Winner of 5 out of 6 coding contests** conducted across departments at RGM CET.

VOLUNTEER EXPERIENCE

GDG on Campus RGM CET

Cloud & Certifications Lead

- Hosted **4+ online technical events** on **Google Cloud, GenAI, and cloud certifications**, helping students build practical cloud knowledge.
- Organized cloud-focused workshops and learning programs, mentoring students on **cloud technologies and certification pathways**.

Nexus Swaram

Technical Volunteer

- Co-hosted and coordinated **5+ offline technical events** with a team, engaging **200+ students**.
- Collaborated with team members to plan and execute technical events, coordinating participants and ensuring smooth event delivery.

CERTIFICATIONS

Microsoft Azure Fundamentals: AZ-900
Google IT Automation with Python: Professional Certificate
Oracle Cloud Infrastructure 2025 Foundations Associate: Oracle
